

TangoWare Announces QuickBooks® Integration !

TangoWare is excited to announce the release of a new AVM-2000 optional module for QuickBooks® Integration (AVM2QB).

QuickBooks® Integration has been our most asked-for AVM-2000 improvement for several years.

We have created a function that will help make your work flow more efficient by preventing double-entry into two different applications. It will also increase accuracy by transferring data directly from AVM-2000 to QuickBooks® with no manual entry.

Please see our *Product Features* highlights below as well as a few screenshot samples on Page 2.
